About Me

Front-End Developer with over 3 years of hands-on experience building scalable, intuitive web applications using React, Next.js, and TypeScript. I specialize in delivering elegant user interfaces, integrating secure backends, and managing complex TypeScript structures. Experienced in developing SaaS platforms, handling authentication flows, and building mobile-first applications with Expo. I bring an analytical mindset, attention to detail, and a dedication to writing clean, maintainable code.

Skills

Languages & Tools: TypeScript, JavaScript, HTML, CSS, Git, GitHub

Frontend: React.js, Next.js, React Native, MUI Joy UI, Tailwind CSS, Expo, Zustand, Axios, React Query

Backend: Node.js, Express, MongoDB, socket.io

Other: JWT Authentication, SSR, REST APIs, Responsive Design, Vercel Deployment, Custom Domains

Work Experience

Developer – Al-Ekhtyar Al-Sahl

Jul 2024 – Present

- Developed the main interface of the **Sadah** platform using Next.js—a CRM system for the real estate sector focused on conversational engagement.
- Built dynamic vendor websites for the Sadah platform, each with subdomain or custom domain support, allowing vendors to showcase real estate offers.
- Integration of payment gateway (Moyaser)
- Implemented SSR-based JWT authentication in Next.js

- Designed and developed a Node.js-based microservice that enables users to connect their personal WhatsApp accounts to Sadah.
  - Enabled real-time message sending/receiving (text, image, document) similar to WhatsApp Web.
  - Integrated contact importing from connected WhatsApp accounts directly into the platform.

Freelance Developer

Oct 2023 – June 2024

- Built and deployed multiple full-stack and front-end projects (see portfolio)
- Designed SaaS infrastructure supporting subdomains and custom vendor domains
- Worked on Qistar project (platform organizes the relation between the renter and the owner of real estate where the owner gets the rent annually and the renter pays monthly) - I developed the main platform, dashboard and the landing page using React.js
- Integrated push notifications with Expo for cross-platform mobile apps

Front-End Developer – KTL, Khartoum

May 2022 – Oct 2022

- Developed a logistics dashboard using React and REST APIs
- Collaborated with backend engineers for seamless API integration
- Improved UI responsiveness and optimized rendering performance

Education

Bachelor of Medicine and Surgery (MBBS)

Transitioned to software through self-teaching, hands-on projects, and continuous learning.

Languages

Arabic (Native), English (Professional)
